Gold, a symbol of eternity and prestige.

Architect : Patrick Balcon

Since ancient times, people have used gold to embellish their monuments and give them a sacred character.

To evoke the sense of this precious metal, ArcelorMittal Construction has developed a range of four new golden coloured coatings.

Sparkling, iridescent, satin or grained, they provide a natural illumination to the facades of a building and give it a luxurious shine. They create a distinctive and uplifting golden glow.

Combined with other colours for a resolutely modern design, gold emphasizes contrasts, enhances reliefs, provides radiance and makes a powerful architectural statement.
